

Cloud Governance Assessment

AI powered cloud governance that delivers speed, savings, and security.

Is your cloud estate secure, compliant and cost efficient? If you are grappling with increased costs, concerned with cloud security or architecture best practices, we can provide you with rapid, near real-time governance insights across operational or project environments.

Our AI Cloud Governance Assessment gives you a clear view of your cloud environment, highlighting risks, cost-saving opportunities, and compliance gaps – so you can take action with confidence.

Our proven approach

We manage the entire journey – from scoping and analysis to clear reporting, expert recommendations, and full remediation – ensuring risks are reduced and value is delivered at every step.

The impact you can expect

✓ Up to **85% faster results*** compared to traditional engagements.

✓ Up to **70% more cost effective*** than a traditional professional services approach.

**Based on Sopra Steria delivery outcomes*

Assessed against the well architected framework pillars
