Government Digital Service (GDS) Aligned Accelerator

Launch GDS-compliant portals up to 70% faster with our GDS Accelerator

Sopra Steria's GDS-aligned Accelerators provide a pre-configured suite of Power Page components designed to expedite the development of accessible, reusable, and GDS-compliant portals and web applications. Going beyond mere compliance, these accelerators enhance development speed and elevate the overall user experience.

Key features of the GDS Accelerator

1.

GDS-aligned components:
Prebuilt components include page layouts, colors, controls, and templates matching GOV. UK Design standards.

2.

Reusable modules:
Use pre-built libraries of UI controls and templates to reduce development time and improve consistency.

3.

Integration and accessibility:
Enabling secure access to data and processes with real-time synchronisation.

4.

Accessibility by Design:
Ensuring inclusivity with tools like screen readers and speech recognition, compliant with various conformance levels of WCAG 2.2.

Flexibility and Extensibility
Adaptable to specific design needs.

Low-Code/No-Code
Compliant solutions with intuitive frameworks.

The impact you can expect

✓ Up to **70%** faster development.

✓ GDS aligned.

✓ Up to **2x faster acceptance and approvals.**
