

Identifying and protecting vulnerable people at the border

A STEP BY STEP GUIDE TO OUR APP

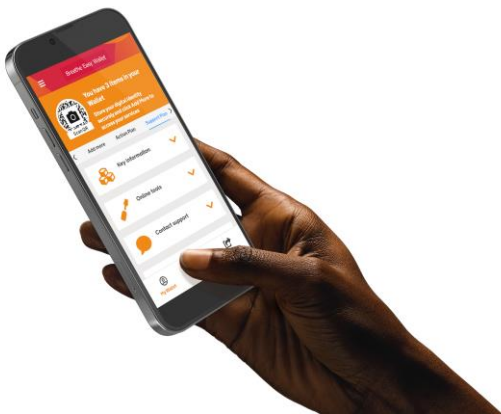

The world is how we shape it

sopra  steria

— Sopra Steria has developed a **prototype app** to demonstrate the art of the possible for providing the right support at the right time for vulnerable people arriving at a border.

— To find out more visit:

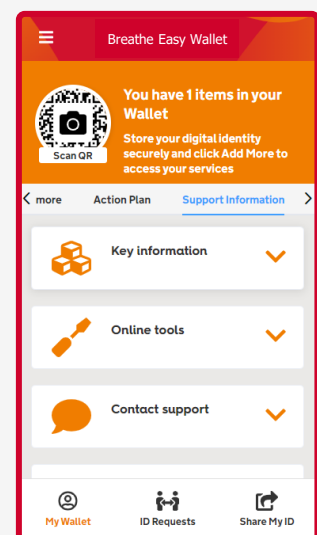

— www.soprasteria.co.uk/breathe-easy-borders

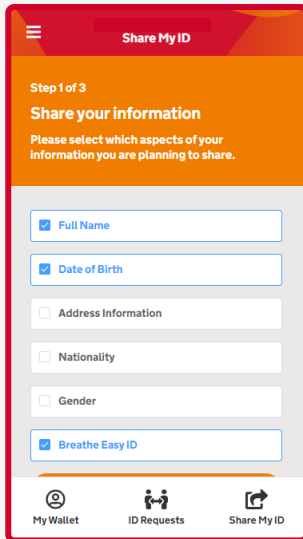

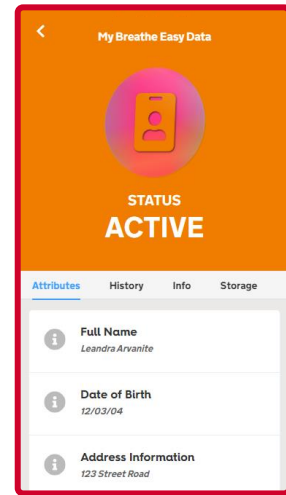

— When vulnerable people enter a country they need support services.

— The **Breathe Easy Wallet** gives them access to services based on a digital identity given to them at the border.

— By downloading the **Breathe Easy Wallet** individuals can find support information specific to them from their **needs assessment**.

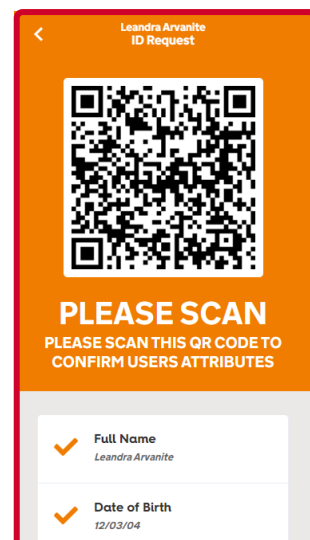

- When opening the wallet, a **Digital Identity with verified credentials** is ready for them to share with support organisations to prove they are who they say they are.

- When accessing services, people can **digitally share** their specific data relevant to the services they need.
- It's always controlled by the individual in a safe and secure way.

- If the organisation can't digitally receive the individual's data the app can display a **QR code which shows the individual's eligibility** for the service they are applying for.

- As an individual takes advantage of the services available through the **Breathe Easy Wallet** and they become established the Wallet continues with them to **accommodate new ID documents** they may acquire, such as a visa or a driving license.

- At Sopra Steria our aim is to work with our clients to **enhance and improve the immigration experience** for passengers.

You can find out more about the APP at Sopra Steria's exhibitor stand B111
