

# Modular Digital Banking

A new way to build a bank

## Who is it for?

New entrants

Established banks  
(to augment existing banking software)

Challenger banks

## How it works:

Seamless and secure

Software as a Service / Fully hosted / Cloud based solution / Fully managed service

## Select on demand services and components including:

Business Intelligence and Analytics

Customer Interaction Centre

Additional FinTech solutions

Regulatory Reporting

Prospect and Customer Information Portals

Branches: kiosks and pop ups

Personal Finance Management

Cards: ATM and POS

Biometric Authentication

## It delivers

Flexible, modular and scalable banking solutions

Inbuilt, 'future-ready' security to meet specific regulatory requirements

A single point of contact and accountability for all service aspects

Proven, tried, tested banking platform

'At scale' delivery for banks of all sizes

Customer centricity from the ground up

A solution that is adaptable to changing business and market needs

## Innovative banking

Start big or small

End-to-end

Tailored solution based on standard components

Fully interoperable with existing systems
