OVERVIEW**

Operational Security Management

*Dynamic Services For Day-In,
Day-Out Protection*

Your organisation's use of IT is dynamic, constantly changing to improve operations and how you interact with suppliers, partners and customers. At the same time the threat landscape is equally dynamic with unscrupulous individuals, both internally and externally, constantly seeking to refine their methods of attack.

Consequently, your security strategy cannot stand still. Your organisation must be constantly adapting its policies, practices and tools to encourage innovation while protecting against new threats.

Sopra Steria's operational management services help you do this by augmenting your security team with the appropriate day-to-day support, knowledge and resources it needs to maintain the highest levels of protection.

Our service approach

Our offerings provide end-to-end cyber security capabilities

Flexible packages

At Sopra Steria we offer a comprehensive range of services that cover all aspects of security. We know that not every organisation is the same. So we've designed our services so they can be tailored to your specific requirements.

Perhaps you want to plug a knowledge gap or need someone to continually review policies. Maybe you need regular risk assessments or audits carried out. Perhaps you need help with managing incidents. Whatever your requirements, we can put together a flexible package for you.

Once we've designed a package for you it's not set in stone either. At any time it can be adapted to meet new requirements, for example the temporary or permanent loss of a key person or the addition of new applications or compliance obligations.

A single point of contact

We'll also assign an experienced security account manager to you - on-site if required. Their role is to provide you with the best possible security environment by managing all the information and resources related to the services we provide, both within and outside your organisation.

Our security account managers are knowledgeable and experienced in their own right. As well as managing our services for you, they can also provide you with help and advice about all aspects of developing and executing your security strategy.

Built-in best practices

Based on our experience and knowledge we've industrialised and standardised the way we deliver our solutions. As a result, you receive a higher quality; more efficient service delivered using the very latest tools and techniques. Governed to the highest standards, our approach ensures compliance and provides total transparency. Reporting is also standardised, to provide, clear actionable insight.

Access to trends

Sopra Steria provides services to some of the most security conscious organisations across Europe, in both the public and private sector. As a result, we have sight of information, solutions and trends that simply would not be available to individual organisations.

Using these insights we are continually learning, increasing the breadth of our experiences and refining our approach to deliver high quality services that help you build better security solutions, policies and processes for your organisation and, as a result, deliver superior protection without stifling innovation.

With Sopra Steria operational management services you can confidently outsource some or all of your day-to-day security management to obtain access to greater expertise, knowledge and best practice process management. Our menu-driven approach provides you with the flexibility to select and integrate the services that meet your needs today, tomorrow and at any time in the future.

About Sopra Steria

Sopra Steria, European leader in digital transformation, provides one of the most comprehensive portfolios of end to end service offerings in the market: Consulting, Systems Integration, Software Development and Business Process Services. Sopra Steria is trusted by leading private and public organisations to deliver successful transformation programmes that address their most complex and critical business challenges. Combining high quality and performance services, added-value and innovation, Sopra Steria enables its clients to make the best use of information technology.
